

# Instalação Uptime Kuma

Link: <https://github.com/louislam/uptime-kuma>

git clone <https://github.com/louislam/uptime-kuma.git>

Uptime Kuma is an easy-to-use self-hosted monitoring tool.

GitHub Sponsors Translation status

## Live Demo

Try it!

Demo Server (Location: Frankfurt - Germany): <https://demo.kuma.pet/start-demo>

It is a temporary live demo, all data will be deleted after 10 minutes. Sponsored by [Uptime Kuma Sponsors](#).

# 📦 Features

- Monitoring uptime for HTTP(s) / TCP / HTTP(s) Keyword / HTTP(s) Json Query / Ping / DNS Record / Push / Steam Game Server / Docker Containers
- Fancy, Reactive, Fast UI/UX
- Notifications via Telegram, Discord, Gotify, Slack, Pushover, Email (SMTP), and 90+ notification services, [click here for the full list](#)
- 20-second intervals
- Multi Languages
- Multiple status pages
- Map status pages to specific domains
- Ping chart
- Certificate info
- Proxy support
- 2FA support

## 📦 How to Install

### 📦 Docker

```
docker run -d --restart=always -p 3001:3001 -v uptime-kuma:/app/data --name uptime-kuma louislam/uptime-kuma
```

Uptime Kuma is now running on <http://0.0.0.0:3001>.

#### Warning

File Systems like **NFS** (Network File System) are **NOT** supported. Please map to a local directory or volume.

#### Note

If you want to limit exposure to localhost (without exposing port for other users or to use a [reverse proxy](#)), you can expose the port like this:

```
docker run -d --restart=always -p 127.0.0.1:3001:3001 -v uptime-kuma:/app/data --name uptime-kuma louislam/uptime-kuma
```

# Non-Docker

## Requirements:

- Platform
  - ☐ Major Linux distros such as Debian, Ubuntu, CentOS, Fedora and ArchLinux etc.
  - ☐ Windows 10 (x64), Windows Server 2012 R2 (x64) or higher
  - ☐ Replit / Heroku
- Node.js 18 / 20.4
- npm 9
- Git
- pm2 - For running Uptime Kuma in the background

```
git clone https://github.com/louislam/uptime-kuma.git
cd uptime-kuma
npm run setup

# Option 1. Try it
node server/server.js

# (Recommended) Option 2. Run in the background using PM2
# Install PM2 if you don't have it:
npm install pm2 -g && pm2 install pm2-logrotate

# Start Server
pm2 start server/server.js --name uptime-kuma
```

Uptime Kuma is now running on <http://localhost:3001>

## More useful PM2 Commands

```
# If you want to see the current console output
pm2 monit

# If you want to add it to startup
pm2 save && pm2 startup
```

# Advanced Installation

If you need more options or need to browse via a reverse proxy, please read:
